DETAILED ACTION

Response to Amendment

1. Applicant's amendment of claim 1 is acknowledged and has been entered.

Rejections Withdrawn

2. Applicant's arguments, see page 3, filed November 29, 2004, with respect to the rejection of claims 1-4 under 35 U.S.C. 112, second paragraph, have been fully considered and are persuasive. The rejection of claims 1-4 under 35 U.S.C. 112, second paragraph, has been withdrawn.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Bryning et al [US 6,296,702].

With respect to claim 1, Bryning et al teach a method comprising a spotting device positioned at a selected array position, and dispensing a selected volume aliquot of reagent, such as a biological sample (column 2, lines 17-20) less than about 1 μ L (between about 2 L and 2 nL) at the location (column 9, lines 60-64), which, at its maximum range, would produce a spot with a diameter of at least 1 mm. The spotting device comprises an elongated fiber disposed within a tube adapted to contain a selected liquid (column 2, lines 17-20). Shifting means are

operatively connected to the fiber for shifting the same between its raised and lowered positions, such as an actuator (column 2, lines 36-46).

5. With respect to claim 2, Bryning et al further teach a plurality of tubes and associated fibers and shifting means (column 3, lines 15-20).

6. With respect to claims 3-4, Bryning et al teach a method comprising a spotting device positioned at a selected array position, and dispensing a selected volume aliquot of reagent less than about 1 μ L (between about 2 L and 2 nL) at the location (column 9, lines 60-64).

Response to Arguments

7. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. No claims are allowed.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nelson Yang whose telephone number is (571) 272-0826. The examiner can normally be reached on 8:30-5:00.
